Light Your Home in a Smarter Way

Kasa Smart Wi-Fi Light Switch **HS200**

kasa smart

works with the Google Assistant · WORKS WITH alexa · Kasa Exclusive Smart Actions · Readers' Choice

---

Voice Control · Control from Anywhere · Set Schedules

"Alexa, Turn on the Kitchen Light."

"Alexa, Turn off the fan."

Voice Control

Use simple voice commands to control your switch with Alexa or Google Assistant.

Away Mode

Set your smart light switch to turn connected fixtures on and off at random intervals to give the appearance you're home even while you're away.
Grouping & Scene

Group your smart switch with other smart devices to control them all simultaneously, or set custom scenes to match any occasion like waking up.

Guided Install

The Kasa app includes detailed, easy-to-follow, step-by-step instructions for installation. It takes less than 30 minutes and uses common household tools.
1 Remove the Old Switch

Turn off power and remove your old wall switch.

2 Check for Neutral Wires

Look for a bundle of white wires folded up in the back of the junction box and secured with a wire nut; these are neutral wires and are required to use Smart Switch. Most homes built since 1978 have neutral wires.
NEUTRAL

3 Connect the Wires

Disconnect all of the wires from the old switch and connect them to the corresponding wires on the new Smart Switch.
Enjoy a Smart Home with Smart Actions

Kasa Smart Switch is now an integrated smart controller. Press the switch to easily mirror on/off controlling to other Kasa Smart devices, whether it's wire-connected or not. Explore more possible interactions in the Kasa Smart app.
