

Durable Lightning Cable | Kevlar Aramid Fiber | EMI Protection | TPE Cable Jacket

Built for Daily Use

The durable Lightning cable has aramid fiber reinforcement that shelters it from the stress of frequent bends and twists. This also lets the cable flex without over-stretching, and strengthens the core of the cable.

Cable Key Features

1. Aramid fiber adds strength and durability to the cable
2. Insulated conductors reduce friction, provide more flexibility
3. EMI (electromagnetic interference) protection with aluminum-mylar foil with braided shielding
4. TPE (thermoplastic elastomer) cable jacket is softer and more flexible than a standard PVC cable

Flexible Strain Relief

The cable is constructed to prevent the connector from separating from the jacket. The extra-long strain relief molding is tested to withstand over 10,000+ bend cycles at a 180° angle. Plus, the improved inner molding resists cracking and reduces cable damage.

**Connector Key Features:**

1. Lightning connector provides 12W for charging your iOS devices
2. Metal shield protects circuit board from EMI and reinforces the connection point
3. Strain relief tested to tolerate over 10,000+ bend cycles at a 180° angle
