

The whole-home wifi system that just keeps getting better.

01

Ready right out of the box.

Set up your wifi in minutes. Simply download the app, plug your eero into your existing modem, and find out where to best place your eero devices.

02

Always optimizing for your home.

From day one, eero TrueMesh technology adapts to your usage and needs to maximize your connection. So you can get a reliable network all throughout your home (and backyard).

[LEARN MORE](#)

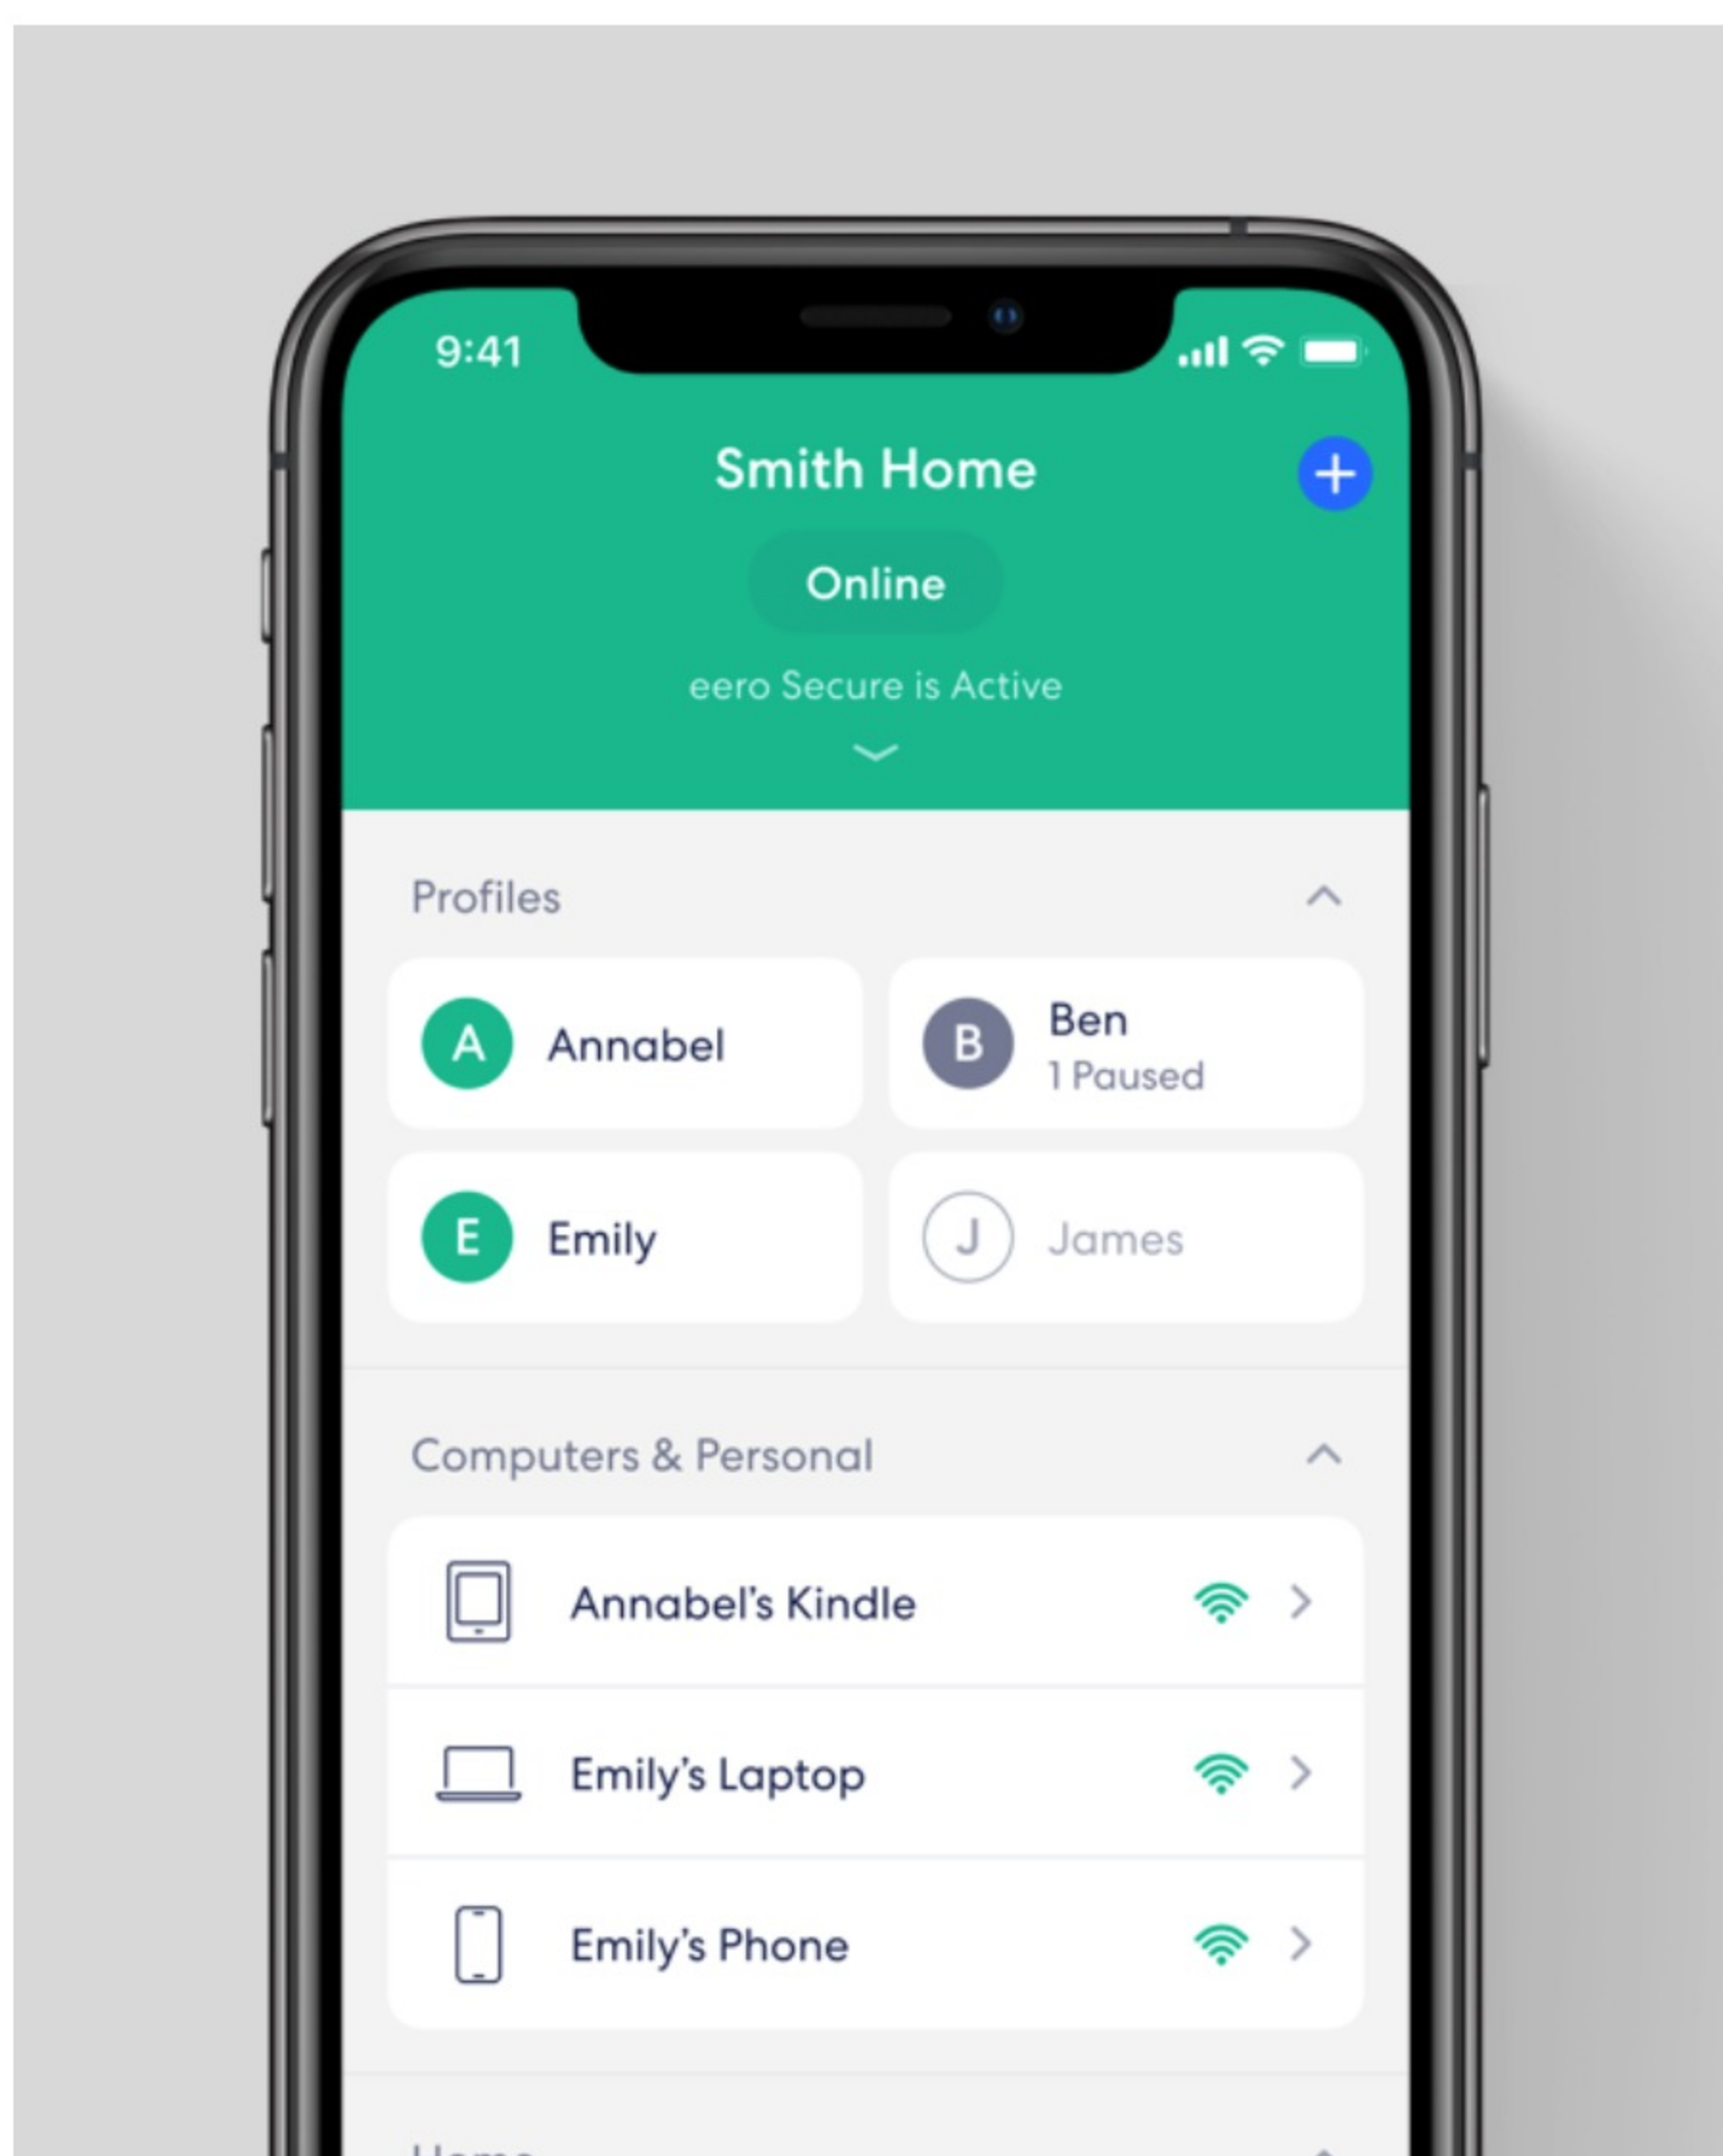

03

Control in the palm of your hand.

See what's happening

See your network speed, find out which devices are connected, and make sure each eero is working properly (but trust us, it would be weird if they weren't).

04

Added protection for your network.

Normal routers require you to proactively install security patches. eero updates its encryption and security protocols automatically to protect your network from the latest threats. Plus a subscription to **eero Secure** safeguards your connected devices, prevents visits to malicious sites, blocks ads, and more.
