

## Find Wired and Wireless Network from Any Outlet with Your Home's Electrical System

300Mbps AV600 Powerline Wi-Fi Extender

**TL-WPA4220**

### Extend Your Network to Any Room Using Existing Powerline

The TL-WPA4220 transforms your home's existing electrical circuit into a high-speed network with no need for new wires or drilling. With advanced HomePlug AV2, TL-WPA4220, an add-on unit, is perfect for further extending the existing powerline network, providing stable and high-speed data transfer rates of up to 600 Mbps on a line length of up to 300 meters and bringing wired and wireless network simultaneously to anywhere there is a power outlet.

### Wi-Fi Auto-Sync for Unified Wi-Fi Network

Pressing the Wi-Fi Clone button instantly copies your network name and password from your router for easy setup. Wi-Fi Move automatically applies any settings changes across the network. Your existing Wi-Fi settings will be synchronized to the new extender automatically.

### Two Fast Ethernet Ports for Wired Connections

With two fast Ethernet ports, the TL-WPA4220 can run multiple high-speed and reliable wired connections at the same time for devices like smart TVs, PCs, and game consoles. One Ethernet cable is included in the box.

### Powerline Management on Your Smartphone

The tpPLC Utility and tpPLC app make it easy to control wireless network settings, set schedules for Wi-Fi availability and even control the LED indicators on your adapters from any iOS or Android device. You can download the tpPLC app for iOS and Android devices.
