

Increase Your Network Reliability and Save Energy

5-Port Gigabit Desktop Switch

TL-SG105

Link your devices, Create Convenient Business

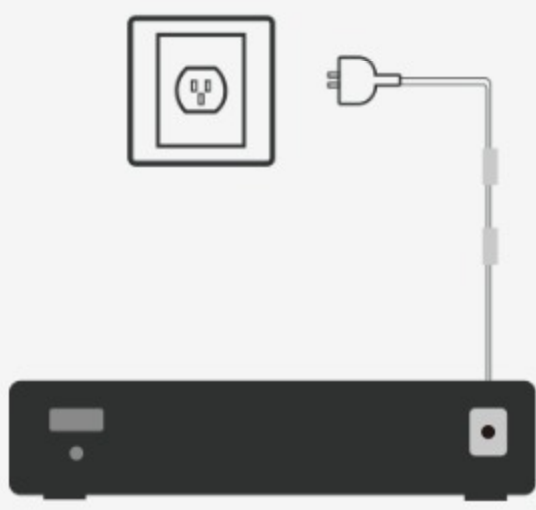

The TL-SG105 Desktop Switch provides you an easy way to increase the speed of your network server and backbone connections. Whether you are at home or in the office, the TL-SG105 can always help you deal with your business quickly and easily.

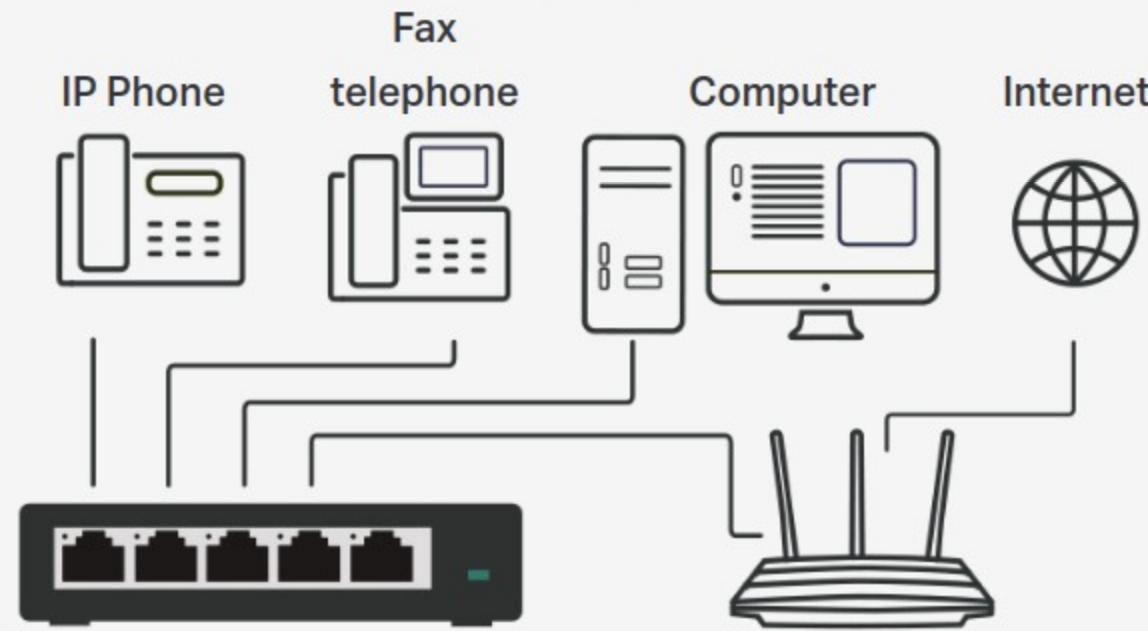

Plug and Play, Easy to Internet

A plug-and-play design makes for easy deployment without the need for a technician. Auto-negotiation on each port senses the link speed of a network device and intelligently adjusts for compatibility and optimal performance.

Gigabit Ports For More Reliable Speeds

Increase the speed of your connected devices with the LS1005G 5-port Gigabit desktop switch. 5x non-blocking gigabit ports enable instant transferring of large, bandwidth-intensive files without interference.

Go Green with Your Ethernet

TP-Link's latest generation of Unmanaged Switches make use of innovative energy-saving technologies. Power consumption automatically adjusts according to link status and cable length, allowing you to expand your network while minimizing your carbon footprint. Save the planet and lower your energy bills — it's a win-win!
