

Goodbye wires.
Instant setup.
Business-minded Wi-Fi.

orbi PRO
Tri-Band Business Wi-Fi System

Goodbye weak signals and dead zones.

Orbi Pro satellites can be placed anywhere near a dead zone and within minutes, the new satellite will deliver strong tri-band Wi-Fi to those hard-to-reach areas.

No wires, no more dead zones, no problem.

Keep your company, employees and customers connected.

The Orbi Pro system comes with 3 pre-defined networks for traffic separation with different levels of network access.

Network 1: Admin/Manager

- Internet access
- Access to critical infrastructure
- Secured by password known to admin

Network 2: Employee

- Internet access
- No access to critical infrastructure
- Different SSID secured by password

Network 3: Guest

- Configurable access for limited time (e.g. 1 hr)
- Requires agreement to Terms & Conditions
- No access to critical infrastructure

Blazing-Fast 3 Gigabit AC Wi-Fi

Reliable and high-performance AC3000 Wi-Fi for up to 350 m2 with optimised simultaneous connections for up to 40 users (MU-MIMO).

Separate Guest User Access

Orbi Pro comes with 3 predefined networks with traffic isolation for network owner/administrator, employees and customers. And includes a customisable guest portal.

Location Flexibility

Orbi Pro can be simply placed on a table top or mounted easily to any wall or ceiling to fit in any corner of your business, whatever the size.

Wire-Free Installation

No need to run cables. Power up the Orbi Pro Satellite and it will automatically connect to the Orbi Pro Router.
