

Slim Body, Big Energy

10000mAh Li-Polymer Power Bank

TL-PB10000

Choose a Power Bank with Superior Li-Polymer Battery

Li-Polymer battery is thin and lightweight while it also improves safety, leading to its wide applications in premium digital devices. Compared to those using Li-ion battery, this power bank looks much sleeker and thinner. It is a portable charger that perfectly fits in your hand while working with your phone.

Power Your Digital Life on the Move

Housed in a portable design, TL-PB10000 is a high capacity 10000mAh power bank compatible with most of your digital devices. With full capacity, it can hold enough juice to fully charge your device once or even more times.[†]

Dual Smart Fast Charging Ports Provide Flexible Power for Different Devices

This high capacity charger has 2 high-speed smart charging ports that detect the connected device and provide up to 2.1A adaptive power output. Powered by TP-Link Smart Charging technology, it is optimized for iOS devices and boosts up to 65% faster than original Apple iPhone charger. These flexible output ports are designed to be capable of delivering appropriate power for devices with large and tiny battery respectively.
