

Studio-Quality Sound

For Your Home Office

Video conferencing and working from home are the new normal. Make sure you sound professional and are heard clearly during important pitches, presentations and proposals. Compatible with third-party software conferencing platforms including Zoom and Microsoft Teams.

Make an impact

During your virtual pitch.

The MV5C can be used with or without headphones and essential tool for the home office that connects directly to your Mac or Windows computer via provided USB cables to ensure that you are heard clearly during important video conferences.

Speech Enhancement Mode

Speech Enhancement Mode provides automatic equalization that boosts vocal frequencies for clear, consistent speech. The MV5C's directional microphone element enables better collaboration with high-quality audio by increasing voice isolation and helping to minimize room reverberation.

FULL
CONTROL

Make the MV5C work for you. Adjust volume, change between modes and adjust monitoring options with ease. View your settings by checking the integrated LED panel on the top of the microphone.

Please note, some operating systems require you to manually select the MV5C as your audio source.
