

G U N N A R

Razer™ a world leader in connected devices and software for gamers and Gunnar™ the inventor and world's leading manufacturer of computer and gaming eyewear have teamed up to unleash the ultimate in gaming eyewear.

GUNNAR | Designed by Razer eyewear has been engineered to reduce eye strain and improve visual acuity while gaming. The eyewear features GUNNAR's patented i-AMP® lens technology in frame designs inspired by Razer's iconic black and green branding.

### ELIMINATE EYE STRAIN

GUNNAR | Designed by Razer eyewear features amber lens geometry that focuses light before reaching the eye, allowing images to be seen more sharply while eye muscles relax. This results in higher contrasts, crisper texts and sharper images and helps ease eye muscles during longer sessions at the computer or on a mobile device.

### FILTER BLUE LIGHT

The lenses filter and balance the transmitted light spectrum, reducing high-energy blue light by up to 65% while warming the overall view. This reduction of harsh high-energy blue light helps protect eyes from digital eye strain, long-term retinal damage, and allows the more sensitive parts of the eye to perform, increasing perceived contrast and performance.

### REDUCE GLARE

GUNNAR lens coatings have anti-reflective properties that reduce reflections and glare. Without distracting reflections, the screen appears crisp and clear. While some eyewear may have anti-reflective properties on the front portion, GUNNAR uses the anti-reflection coating on both sides for a crystal clear view.

### FEATURES

- Designed to eliminate eye strain
- Blue light filter up to 65%
- Anti-reflective lens coating to reduce glare
- Aluminium-magnesium frame construction
- Hidden spring hinges to fit a wide variety of head and face shapes
- Adjustable floating nose pads
- Wide format lenses for a panoramic viewing field
- Available in amber and outdoor lens type

### ABOUT GUNNAR

Founded in 2006, GUNNAR Optiks, LLC designs and engineers Computer Eyewear to protect and enhance vision using revolutionary technology solutions. GUNNAR introduced the Technology Eyewear category in 2008 and pioneered the only patented lens technology to reduce digital eye strain and fatigue issues associated with computer use. GUNNAR is a privately held company headquartered in Carlsbad, California. For more information, visit [www.gunnars.com/razer](http://www.gunnars.com/razer).
