

Features

Powerful and bright, mophie's all-new powerstation go rugged flashlight can light the way and power up your smartphone. Plus, this portable battery can even jump start your car.

Power That Lights the Way

Powerful and bright, mophie's all-new powerstation go rugged flashlight can light the way and power up your smartphone. The USB-A port allows you to easily charge your smartphone or tablet. The mophie powerstation go flashlight includes a bright work light that's ideal for changing a tire in the dark or just searching your trunk. Plus, this portable battery can even jump start your car. Whether you're stuck with a dead phone battery or a dead car battery, the mophie powerstation go rugged flashlight lets you stay powerful in just about any situation.

Contains a 36.6Wh battery

Reliable battery cells hold their charge for when you need it most, so you won't have to worry about a dead phone battery or a dead car battery.

LED Flashlight

The powerstation go rugged flashlight has an extra bright 450 lumens LED bulb that brightens any dark situation.

LED Work Light

More than an extra light, the work light offers an SOS feature and a high-visibility red light for emergencies.

Portable Car Jump Starter with Jumper Cables

The powerstation go rugged flashlight can jump start a full-sized truck and 12V vehicle batteries in seconds. Mini jumper cables are also included so you have everything you need to get back on the road in minutes.

Designed for Safety

Don't be afraid of a dead battery! Easy-to-read indicator lights, spark-proof jumper cables, and automated safety checks help make the jump start process as fool-proof as possible.

LED Battery Indicator

Easy-to-read LED lights let you know how much battery is left.
