

**Protecting the driver inside and out**

The Nextbase Cabin View Camera uses a wide-angle cabin lens to record both inside and outside your vehicle. It uses a wider 140° lens to provide an extra level of security for you and your passengers. The lens is designed to record inside the car, as well as through the side windows, making it ideal for taxi and private hire car drivers. The Cabin View Camera can easily be installed by clicking it into the side of your front facing Nextbase Dash Cam model. Dashcams not only serve as protection on the road. They can also act as a [car security camera](#) and provide an extra layer of security when parked up either overnight or during the day.

**Resolution**

When you are using a rear-view camera module the resolution of your front camera will automatically adjust to manage the two high resolution video files. The options for these settings are:

622GW Front 4K, Rear 1080p

422/522GW Front 1080p, Rear 1080p OR Front 1440p, Rear 720p

322GW Front 1080p, Rear 720p

**Module connectivity**

Connects directly to your Dash cam. Records inside the vehicle to capture incidents or activity within your car.

**Compatible with**

Nextbase 322GW, 422GW ,522GW and 622GW models.

**Your independent witness in the car. Prove an accident was not your fault.**
