

# RAZER INVICTA

## AVAILABLE IN

Black | Gunmetal Grey | Mercury White | Quartz Pink

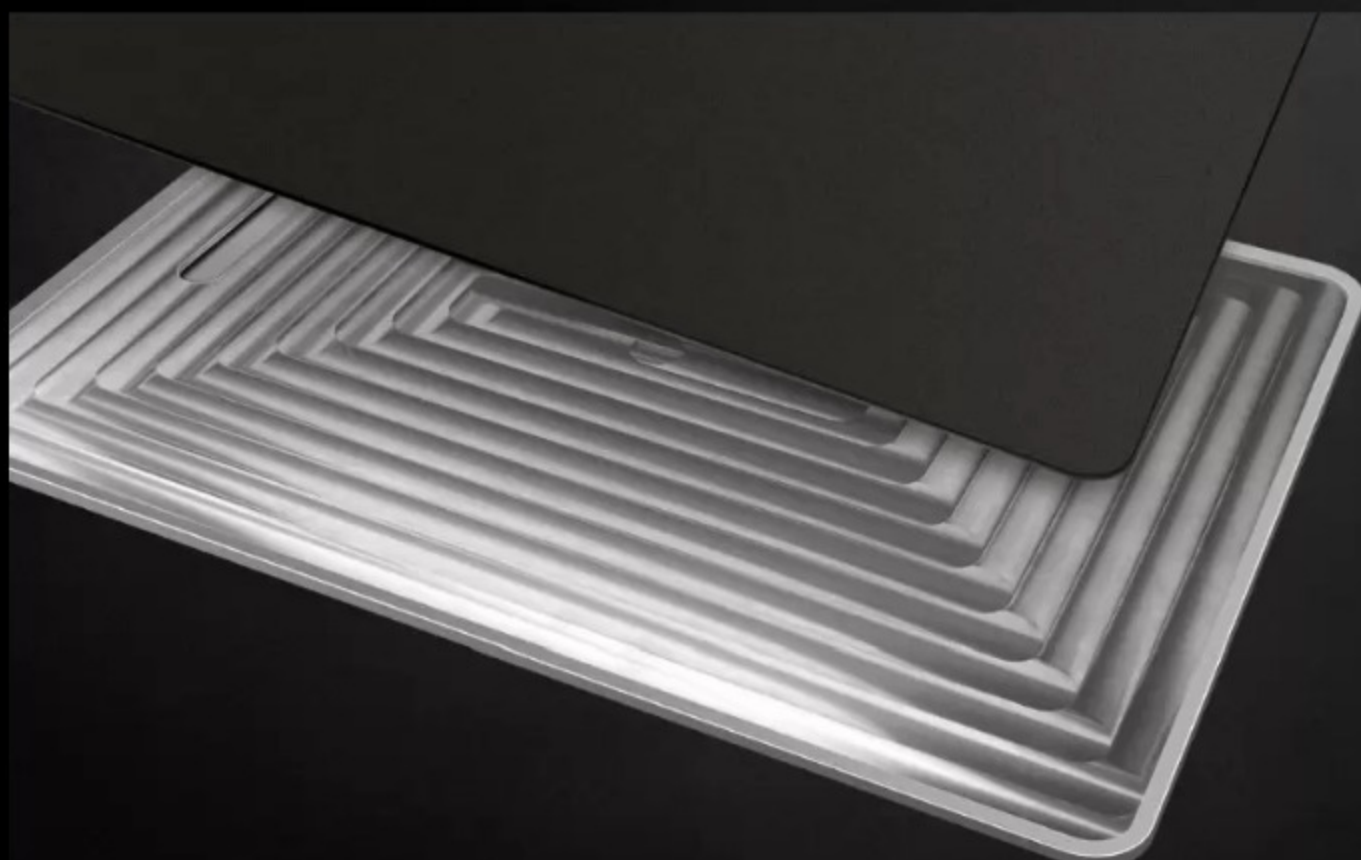

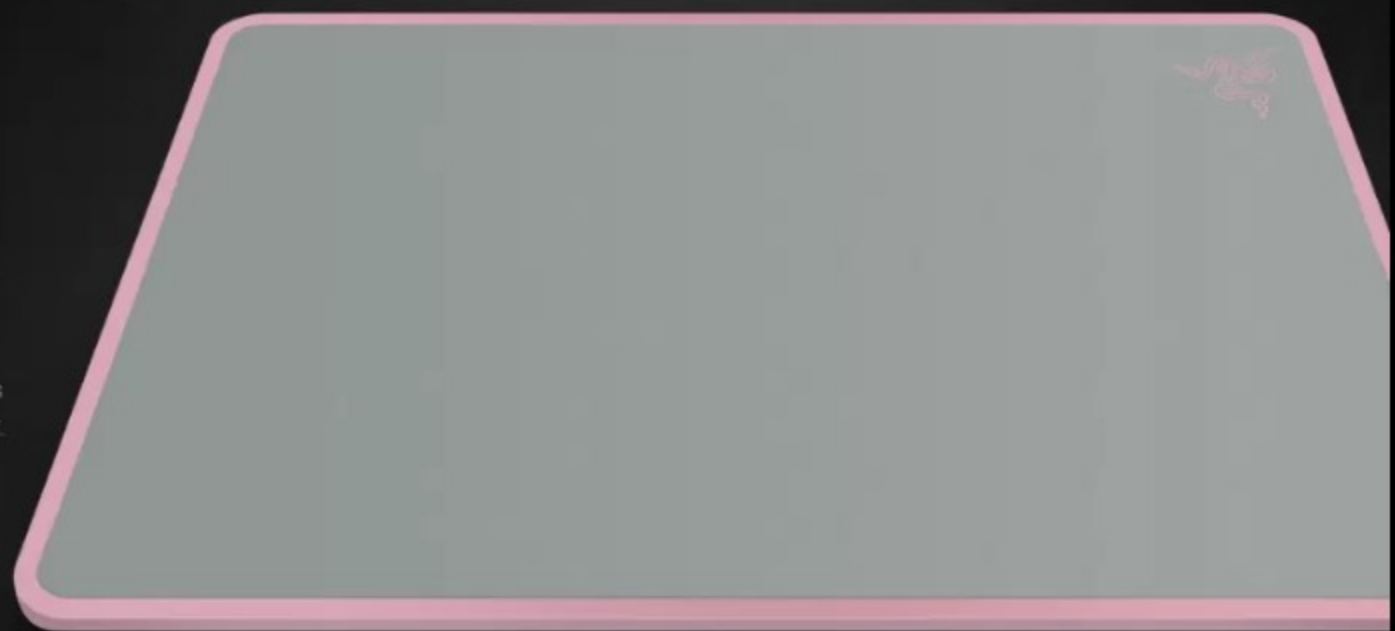

## OPTIMIZED SURFACE COATING

The Razer Invicta features an all-new, lab-tested coating with a specially chosen finish on both sides to enhance the surface's reflective quality. This ensures accurate sensor readings so there are no in-game jitters and tracking remains uninterrupted.

## TWO SIDES, ONE WINNING OUTCOME

You'll be prepared for every in-game situation since the Razer Invicta offers two sides designed for two completely different play styles. The slick-smooth SPEED surface lets your mouse glide freely and quickly to take out opponents before they even have a chance to react. The rough-textured CONTROL surface offers the optimum level of resistance leaving measured mouse movements and a tactile feel in your hand.

## ROBUST ALUMINUM BASE

A symbol of premium design and construction, the Razer Invicta is housed in an aircraft-grade aluminum base for added durability and to prevent the mouse mat from moving no matter how intensively you swipe. A small hole on the underside of the base allows for quick interchangeability between the CONTROL and SPEED sides of the surface during play.

Brand	Razer
Color	Quartz Pink
