

RAZER™ HYPERSPEED WIRELESS

With a high-speed transmission and extremely low latency, this wireless esports headset has an industry-leading 2.4GHz wireless connection to ensure lossless audio that'll always stay synced to your game.

RAZER™ TRIFORCE TITANIUM 50MM DRIVERS

Our all-new patented design allows our engineers to custom tune each driver as though there are three—allowing for the individual replications of high, mid and low audio frequencies to deliver on richer trebles, brighter sound and powerful bass.

The Razer BlackShark V2 Pro also includes titanium-coated diaphragms, giving added clarity to any vocals you hear so that any comms you receive is always crisp and clear.

RAZER™ HYPERCLEAR SUPERCARDIOID MIC

The pickup pattern on this detachable 9.9mm mic has more noise rejection from the sides as compared to a cardioid mic, and provides a true recreation of your voice thanks to a sensitive low frequency response and an open microphone housing designed for minimal obstruction. Includes Razer Synapse 3 support for access to advanced mic settings.

ADVANCED PASSIVE NOISE CANCELLATION

From cheering crowds to the hum of your rig, this wireless esports headset shuts out noise using special closed earcups that fully cover your ears, aided by plush cushions that form a perfect seal for greater sound isolation.

FLOWKNIT MEMORY FOAM EAR CUSHIONS

Our new breathable weave minimizes sweat and heat build-up generated by skin contact, while the ultra-soft foam's improved density greatly reduces the headset's clamping force.

THX SPATIAL AUDIO

Increase your immersion and in-game awareness with next-gen surround sound that provides pinpoint positional accuracy and true-to-life acoustics, as you press your advantage with its latest feature: THX Game Profiles. Apply custom-tuned profiles that enhance existing sound design in your favorite games. Choose between THX Environmental Mode for truly lifelike immersion, or THX Competitive Mode for greater spatial awareness.

THX Game Profiles available for games such as
**Apex Legends, Counter-Strike: Global Offensive,
Tom Clancy's Rainbow Six Siege, Valorant**
and more

"The surround mix delivered by THX Spatial Audio and the Razer BlackShark V2 headset works really well with our game engine to place sounds exactly where we expect to hear them. The system makes tracking enemies and managing chaotic firefights a lot easier."

— Erik Kraber, Senior Audio Director - Apex Legends
