

RAZER  
FIREFLY V2

### Powered by Razer Chroma

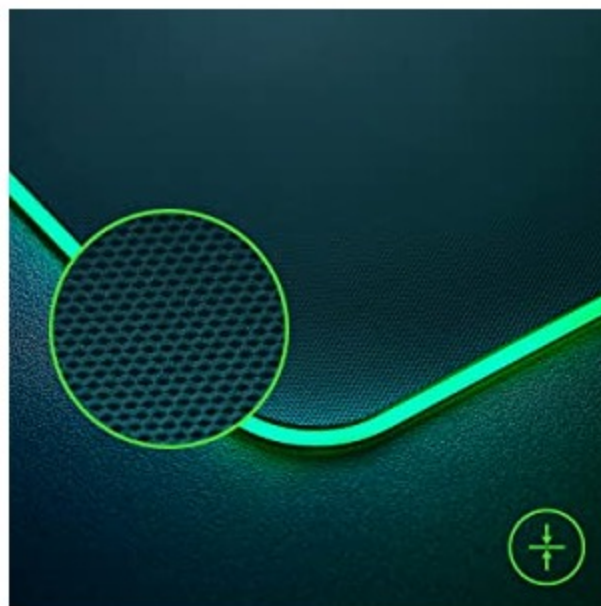

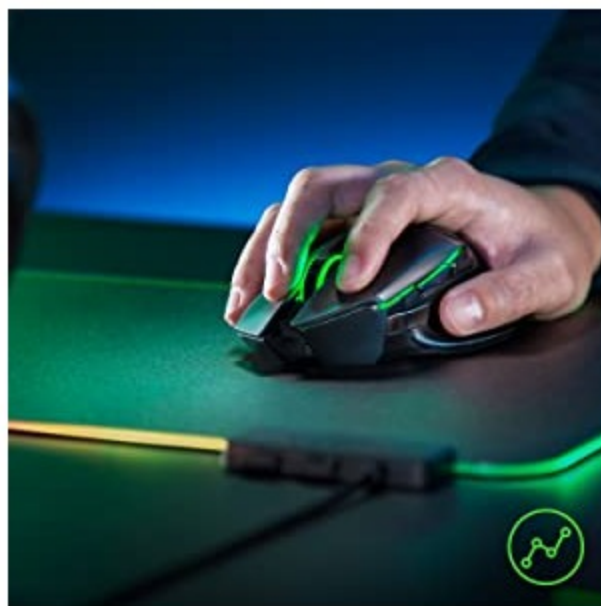

Featuring the brightest Razer Chroma mouse mat yet—fully showcasing 16.8 million customizable colors with seamless Razer Chroma integration capabilities for a personalized gaming ecosystem.

### Micro-Textured Surface

The lab-tested surface comes with a micro-textured finish so that mouse and cursor movements are mirrored precisely, allowing you to aim and maneuver with peak accuracy.

### All-New Built-In Cable Catch

The built-in cable catch lets you manage your mouse cable neatly to prevent it from being entangled, reducing drag for smoother mouse swipes.

### All-Round Edge Lighting

With 19 lighting zones, every side is brightly illuminated to bring you next-level gaming immersion, especially when coupled with in-game light triggers such as frags, countdowns, and health statuses.

### Optimized Surface Coating

Developed and validated by Team Razer esports athletes to provide just the right amount of friction so you can swipe and stop with absolute control.

### Ultra-Thin Form Factor with Anti-Slip Base

The Razer Firefly V2 is only 3mm thin, so your wrist rests comfortably on your desk, while the anti-slip rubber base keeps the mat in place during highly vigorous gameplay.
