

## RAZER™ LINEAR OPTICAL SWITCH

With 1.0mm optical actuation that registers at the speed of light, expect nothing but instant response from every keystroke, as you react and execute clutch plays with clinical efficiency.

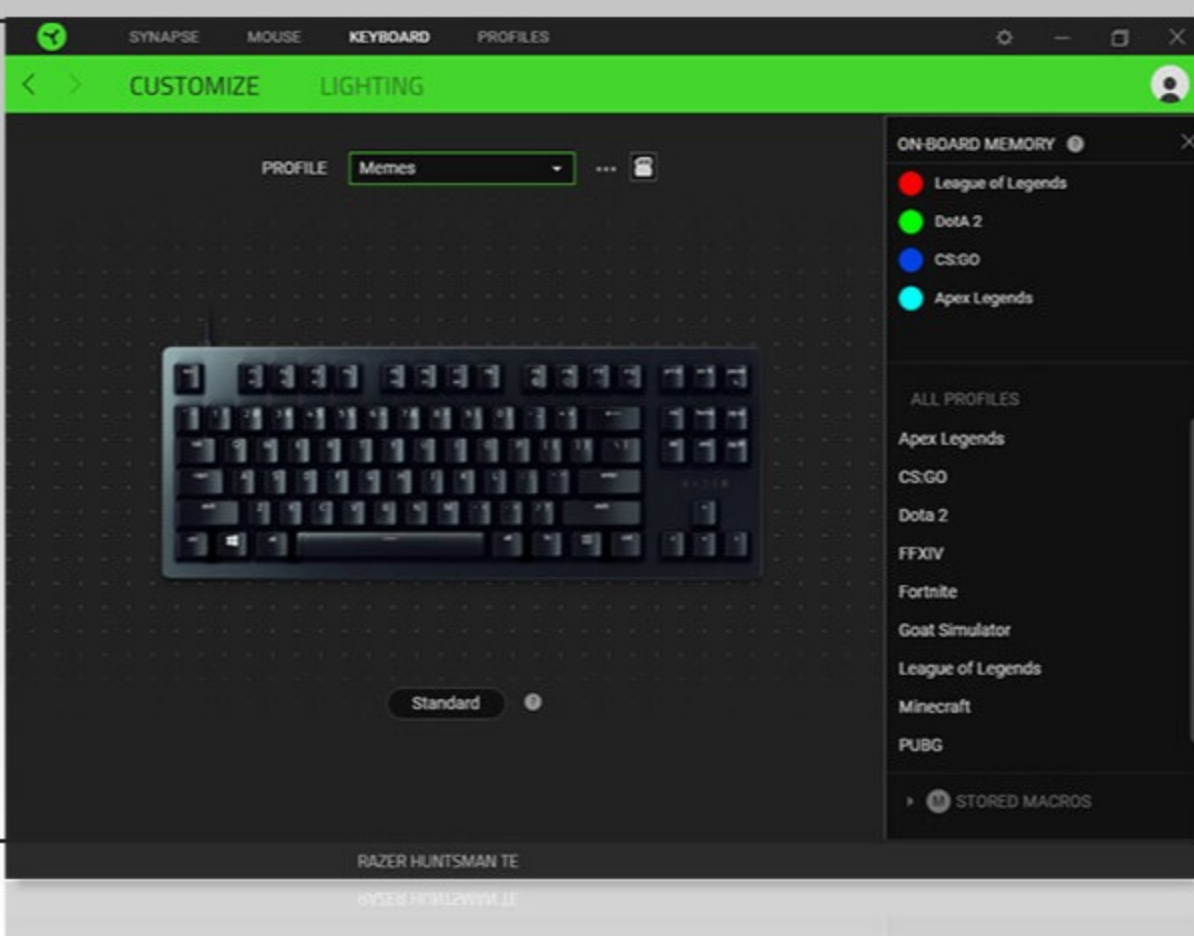

Tested to have an industry-leading durability of up to 100 million keystrokes, the Razer™ Linear Optical Switches are also well-equipped to withstand the rigors of training and competitive play.

## DOUBLESHOT PBT KEYCAPS

Harder and more durable than ABS or PVC, PBT is a thermoplastic that gives the keycaps their premium feel and quality—a tough, textured finish that holds up well against intense use.

Made with doubleshot molding to ensure the labels never wear off, they display the thinnest font ever designed on a PBT keycap to provide a clean, minimalist aesthetic.

## ONBOARD MEMORY

Bring your settings anywhere and be match-ready in no time. Activate up to 5 profile configurations from its onboard memory or custom settings via cloud storage.

## COMPACT FORM FACTOR

The tenkeyless design allows for easier positioning to get your setup just right, and is easy to carry around when travelling.

## DETACHABLE TYPE-C CABLE

Unpack, plug and play with minimal fuss as you move from tournament to tournament. A secure latch ensures that the cable stays connected throughout gameplay.
