

Get ready for a game whirlwind spiced with perfect sound.

Let yourself be drawn into the action

While playing games and watching movies, the Razer Kraken X Lite headphones draw you right into the center of events. They will give you unique surround sound (7.1) in your ears, which will seemingly surround you from all sides. Thanks to the wide frequency range (12 Hz to 28 kHz), you will experience beautifully tuned treble, mids and bass.

Cross-platform compatible

Thanks to the universal 3.5 mm jack connector, you can use this gaming headset with almost any platform. The headphones understand the computer, PlayStation 4, Xbox One and Nintendo Switch consoles as well as mobile devices. The connecting cable of this headset is 1.3 m long.

Easy agreement with teammates

If you play multiplayer games, you certainly need to agree on tactics with your teammates during the event. The Razer Kraken X Lite headset allows you to do this with a cardioid microphone that picks up your voice from an optimal angle. Thanks to this, the communication is always clear and is not disturbed by any traffic from the surroundings.
