PHILIPS

In-ear true wireless headphones
13mm drivers/closed-back Bluetooth®, Black

Highlights

Hybrid Active Noise Canceling

When the song deserves your full attention, these true wireless headphones let you immerse without distraction. One external mic and one internal mic combine to filter out external noise. Awareness Mode lets you bring the world back in when you need to.

Detailed, expansive sound

Perfectly tuned 13 mm drivers deliver powerful bass and thrilling clarity for every track. If you take an earbud out, the music pauses. Put the earbud back in, and the music starts up again.

Compact charging case

The charging case can be charged wirelessly, or via USB-C. A fully charged case gives you an extra 18 hours play time. The headphones will play for 6 hours from a single charge (5 hours with ANC). Charge them for 15 minutes to get 1 extra hour.

Issue date 2021-04-27

Version: 7.2.4

12 NC: 8670 001 66786
EAN: 48 95229 10842 4

Refined geometric design

The circular earbud housing boasts a tactile quality and is designed to subtly catch the light, creating an elegant, understated look. The oval-shaped acoustic tube sits comfortably and securely in your ear and maximizes passive noise isolation.

Mono mode

Two mics in each earbud focus on the sound of your voice, dramatically reducing noise from the world around you. If you're in a quieter place and don't need to block out noise while you're speaking, mono mode lets you use just one earbud to talk.

Philips Headphones app

Enhance the bass. Tone down the treble. The Philips Headphones app puts you in charge of the music you're listening to. Adjust levels yourself or choose from preset sound styles. You can also switch between preset ANC modes with a single tap.

Rock-solid connectivity

Your headphones are ready to pair the instant you take them out of the charging case. Once they're paired, they remember the last device they were paired with. Touch controls on each earbud make it easy to control music, calls, and volume.

Google Assistant

Simply tap the touch controls on the left earbud to wake the Google Assistant, or any other voice assistant. The fully integrated Google Assistant lets you do more completely hands-free. Have notifications read to you, ask to play music-and more.
