- Exclusive push - fit switch socket design to easily vary click resistance and extend the lifespan of the mouse.
- ASUS Aura RGB illumination and compatibility with the Aura Sync ecosystem.

Republic of Gamers (ROG), part of the ASUS family, is dedicated to creating innovative hardcore gaming hardware for gamers. ROG is committed to providing the absolute best performance and quality from its complete line of products. ROG is for those keen on the finest gaming hardware and software, it enables the ultimate computing experience for gamers and enthusiasts worldwide. All the while incorporating a stylish gamer-focused design merging the excitement of gaming with a unique premium style

## ROG STRIX IMPACT II MOONLIGHT WHITE

The ROG Strix Impact II Moonlight White is a lightweight gaming mouse with ambidextrous style that delivers smooth action and superb flexibility. It features pivoted buttons and a soft-rubber cable for fast, tactile clicks and unhindered glides. Its 6,200 dpi sensor ensures pinpoint accuracy and its exclusive, push-fit switch socket design extends lifespan. In addition, a four-level adjustable DPI switch makes it easy to vary sensitivity to match the way you play.

## PRECISE AND ACCURATE SIDEARM

We collaborated with professional gamers in designing the ROG Strix Impact II Moonlight White. The result is a mouse with ambidextrous style and optimized for performance and comfort, weighing a mere 79 grams. The 6,200 dpi sensor tracks at up to 220 inches per second (ips), and a 1000 Hz polling rate ensures high precision, fast response and accurate control—all without a hint of lag. The Impact II Moonlight White even includes five programmable buttons, allowing you to tailor control for your style of play.

- 30 G MAXACCELERATION
- 6,200 DPI RESOLUTION
- 220 IPS MAX SPEED

## PIVOTED BUTTON MECHANISM

Shorter travel means quicker clicks — so our engineers equipped the ROG Strix Impact II Moonlight White with pivoted buttons. The mechanism utilizes springs and metal hinges to balance the keys and minimize the distance between buttons and switches. The upshot is minimal travel and rapid return, ensuring superb speed, responsiveness and consistency with every click.
