High Dynamic Range (HDR) With Exceptional Colors
A DCI-P3 90% color gamut and outstanding color contrast ensure ROG Strix XG43UQ meets DisplayHDR 1000 certification standards. Experience true-to-life colors along with the brightest whites and darkest black hues.

AMD FreeSync Premium Pro | On | Off

Amd Freesync Premium Pro For Smooth Gameplay
Built-in FreeSync Premium Pro technology ensures that ROG Strix XG43UQ delivers supersmooth, low-latency visuals that are brighter and have better contrast. This technology uses low-latency processing for both standard and HDR content to eliminate the input lag that's typically associated with HDR content.

ELMB SYNC ON | ELMB SYNC OFF

Extreme Low Motion Blur (ELMB) SYNC
With ELMB Sync, low-motion-blur technology and adaptive-sync can be enabled simultaneously to eliminate ghosting and tearing for super-sharp, high-frame rate gaming.

SHADOW BOOST ON | SHADOW BOOST OFF

Asus Dynamic Shadow Boost
This technology automatically clarifies dark areas of the image without changing other areas. It makes it easier to spot enemies hidden in dark areas of the map and improves the overall viewing experience.
