

## CHASING Grabber Claw

The small and easy-to-install CHASING Grabber Claw has an adjustable grabbing force of up to 7 kg and is suitable for multiple uses such as sampling detection.

## Up to 7 kg Grabbing Force

With maximum 7 kg grabbing force, the grabber claw can easily complete underwater operations. Adjust different forces on the App to avoid damaging to the clamped objects.

## Smooth Experience and Powerful Functions

With a 120mm opening and closing distance and a 2.8-second single opening and closing time, the grabber claw operates smoothly and can grab a variety of objects.

## 10° Elevation Angle on Holder, Improving the Vision Integrity

The holder increases the angle between the grabber claw and the underwater drone by 10°, avoiding the obstruction of the view and enhancing the experience of the operation effectively.

## Aluminum Alloy Material, Compact Size

Aluminum alloy material, using 4-core watertight connector of underwater drone, length 460mm, diameter 33.5mm, compact and portable.
