MODERN CAPABILITY

26x4.0 Fat Tires

provide improved grip and traction on the most terrain. It can offer you an easy and smooth riding experience.

Front 180Mm Disc Brakes

Sensitive front 180mm, rear 160mm mechanical disc brakes provide ample braking force even in the harshest conditions efficiently.

Electric Brake

Braking is a very important part of escorting our travel. The electric brake is connected to the display and the motor. It can also be used as a normal brake when power is lost.

Dental Plate

A strong dental plate is a very important plus point for a good bike. The crank is driven by pedaling, which in turn drives the rotation of the dental plate, and finally drives the rear wheel to rotate through the chain and flywheel to provide power.
