

# M.O.J.O. M1

Furiously Fast. Deadly Moves.

## Ultra-lightweight, Hollow Pyramid Design

Show off your furiously fast and deadly moves! The M.O.J.O. M1 mouse gives you the competitive edge in FPS games. Weighing only 70g, this mouse lets you move quicker and play longer with less fatigue.

## Designed for Different Grip Styles

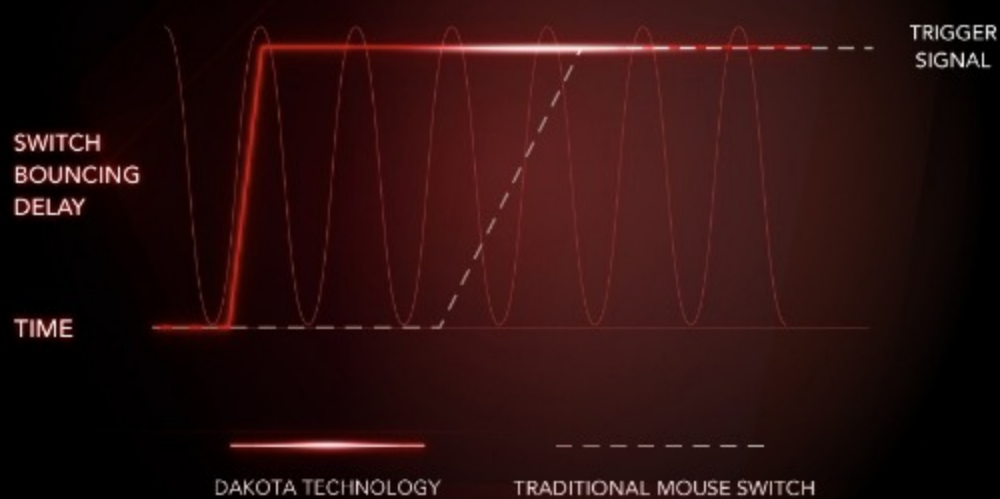

Both ergonomic and aesthetically pleasing, the interwoven hollow pyramid design allows this mouse to accommodate a variety of grip styles while enhancing grip control and minimizing grip pressure.

## Patented DAKOTA Switch

Over time, traditional sensor springs can lose their elasticity and end up transmitting chaotic clicking signals. The patented Mad Catz DAKOTA Switch utilizes advanced signal-detection technology to eliminate the bouncing and debouncing effects of the sensor pin, accurately registering each signal. Not only does this technology make your clicks more accurate, it accelerates the response time to within 2 milliseconds – 60% faster than traditional mechanical switches!

### MAD CATZ DAKOTA TECHNOLOGY

## Advanced Optical Sensor

An advanced PMW3360 12000 DPI optical sensor gives you the superior precision you need to stay alive while tracking and demolishing your opponents.

## RGB Lighting Effects

Personalize your gaming experience with RGB lighting effects you can customize directly from the mouse with no software needed.
