

R.A.T. 4+

Customize Your
Way To Victory

DYNAMIC ERGONOMICS

The R.A.T. range is precision engineered with adjustable key components to enhance your gameplay experience. R.A.T. 4+ features the signature adjustable palm rest and has been expertly engineered to accommodate grip, claw, or finger-tip style play, delivering ultimate gaming comfort even in the heat of battle.

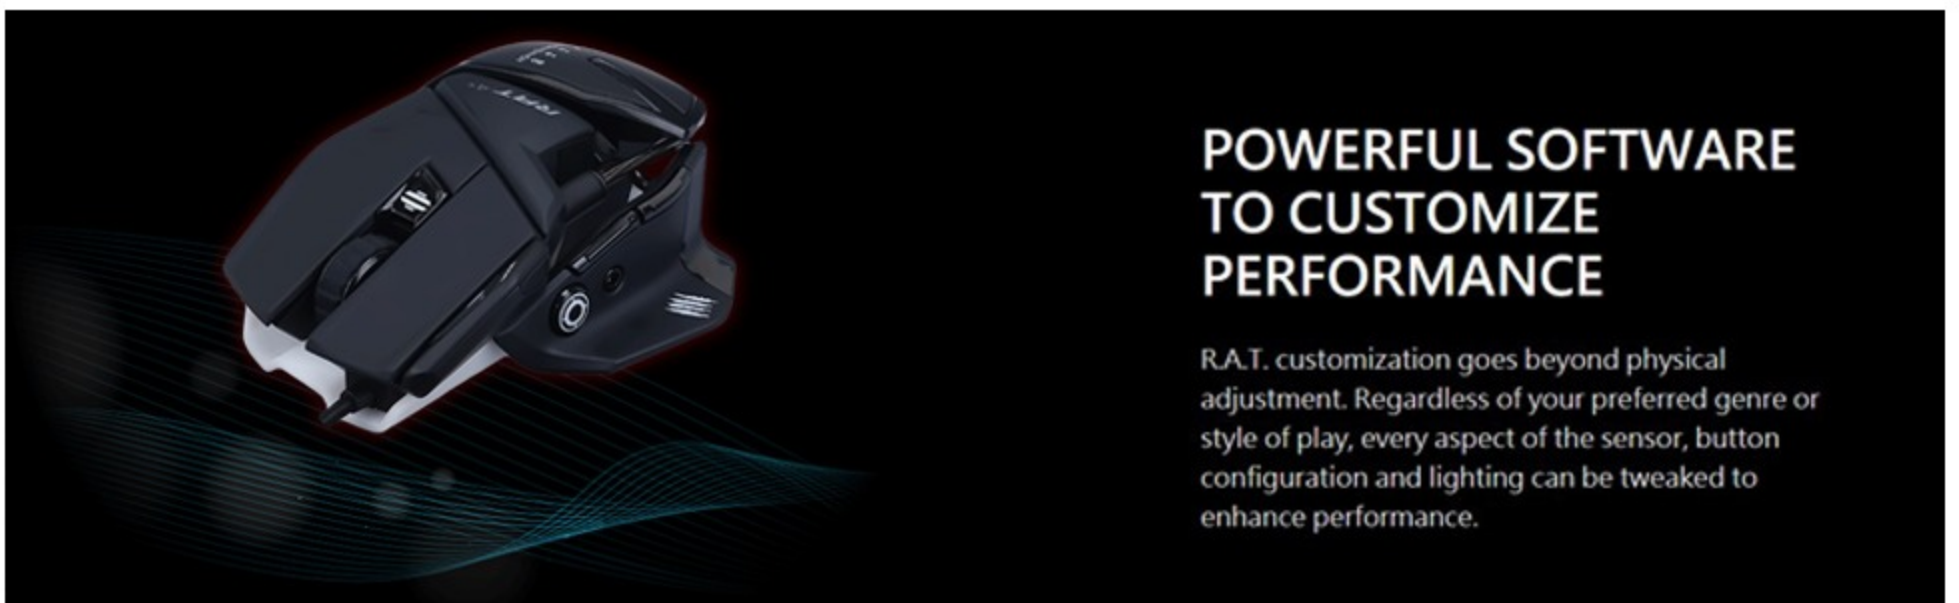

HIGH-QUALITY 7200 DPI SENSOR

R.A.T. 4+ is armed with a gaming-grade Pixart PMW 3330 optical sensor, featuring a 4-level DPI switch from 800 to 7200 DPI and delivering movement speeds of up to 150 inches per second. The R.A.T. 4+ has been crafted for the fast-paced gameplay of today's competitive gaming, giving you the edge you need to win!

7 PROGRAMMABLE BUTTONS

Program your favorite commands and macros to each of the 7 buttons and save them to 4 individual profile slots on R.A.T. 4+. All your moves for the games you play the most, right at your fingertips when you need them.

POWERFUL SOFTWARE TO CUSTOMIZE PERFORMANCE

R.A.T. customization goes beyond physical adjustment. Regardless of your preferred genre or style of play, every aspect of the sensor, button configuration and lighting can be tweaked to enhance performance.
