

Swap & Unleash The Potential

The true ambidextrous design means the B.A.T. 6+ accommodates every gamer and playing style, regardless of how you choose to play. Interchangeable palm rests and skirts let you create the perfect grip and easily accommodate a variety of grip styles, including palm, claw and fingertip.

Side Vented Design

Based on the classic hypercar design, this mouse features side vents to encourage airflow and keep you moving.

Mad Catz DAKOTA™ Technology with Durable Switches

This technology accelerates the response time to within two milliseconds – 60% faster than other mechanical switches! The switches also provide a life expectancy in excess of 60 million clicks, ensuring that your gaming mouse won't let you down in the middle of the action.

Exclusive Sensor for Precision Strike

Built with the Pixart PMW 3389 sensor, the B.A.T. 6+ senses your every move and gives you precise strikes every time, even in the heat of battle.

Cyborg Engine Software

With the included software, customization is a breeze. Easily set your macros and hot keys or adjust the sensitivity to get a competitive edge! You can also personalize your mouse with customizable LED lighting – up to 16.8 million color combinations.

10 Programmable Buttons, 5 Onboard Memory Profiles

With a specially-designed layout of ten (10) programmable buttons, the B.A.T. 6+ gives you the ultimate in customization and control. Five on-board user profiles let you easily save your favorite setups and switch between them as quickly as you change games.
