

Experience the Ultimate in Speed and Performance

with the Vi3000 PCIe NVMe M.2 2280 Internal SSD

Blazing Fast Data Transfer

Transfer massive amounts of data in a flash! The Vi3000's powerful PCIe NVMe Gen 3.0 x4 interface transfers files up to 6x faster than SATA-based SSDs, with speeds of up to 3000 MB/s read and up to 2900 MB/s write.*

*Sequential transfer speeds based on internal testing using ATTO benchmark. Actual performance may vary depending on host computer environment and use conditions.

Vi3000 SSD Benefits

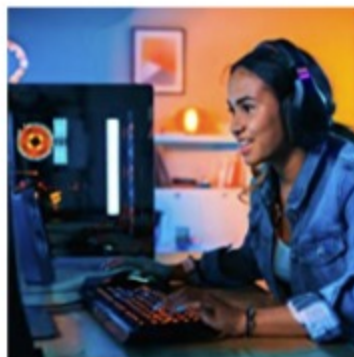

Astounding Speed

Blazing fast data transfer speeds up to 6x faster than SATA-based SSDs.

Exceptional Efficiency

The Vi3000's low power consumption and small form factor save space without sacrificing performance — this compact design makes these SSDs exemplary for laptop use, even with limited chassis or motherboard space.

Powerful Performance

Transform the performance of your desktop or laptop with faster system boot-up and decreased load times for more efficient multi-tasking, faster system responsiveness and increased system reliability.

Quick and Easy Installation

Upgrade your system in no time using the convenient installation guide included.

Looking to get an edge in your game?

Vi3000 SSDs can help you get there! Upgrading your system is quick and easy and can result in dramatic improvements to your gaming experience and give you the edge you need.

Benefits Include:

- Faster load times
- Faster download speeds
- Better multitasking
