

Built for life on the boat.

RUGGED HANDHELD

This handheld is water-resistant (IPX7) with a high-resolution color display you can read in the sun. The glass is even scratch-resistant and fogproof.

DESIGNED TO FLOAT

If rough waters come and the handheld goes overboard, don't worry. This device floats.

BATTERY LIFE

User-replaceable AA batteries (not included) provide up to 19 hours of battery life in GPS tracking mode.

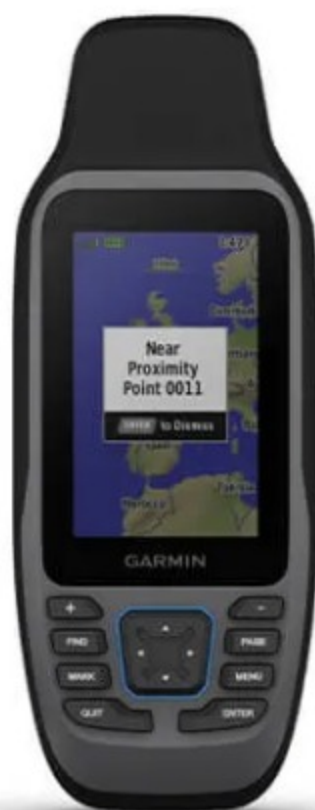

Exactly what you need to navigate.

ACCURATE TRACKING

With support for multiple satellite constellations — such as GPS, GLONASS, Galileo, QZSS and SBAS — you'll get accurate, reliable tracking and positioning around the world.

INCREASED MEMORY

More memory than previous models means you can save and track 10,000 waypoints, 250 routes and 300 fitness activity files.

BUILT-IN COMPASS

The 3-axis tilt-compensated electronic compass shows your heading — even while the boat is standing still.

BLUECHART COVERAGE

Preloaded [BlueChart g3](#) coastal charts (GPSMAP 79sc only) give you leading-edge coverage, clarity and detail with integrated Garmin and Navionics data. Coverage includes the U.S. and the Great Lakes.
