## Details of SAMEBIKE Fat Tire Ebike

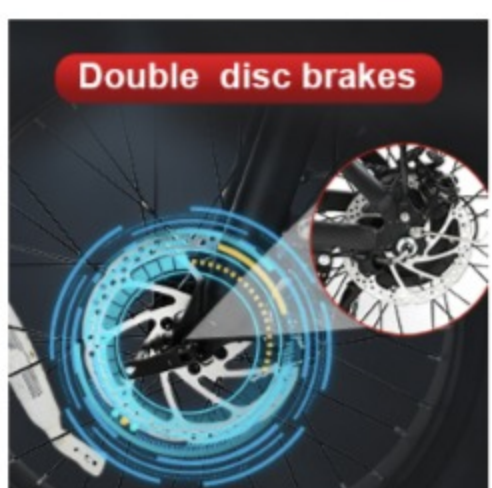

### Powerful Brushless Motor

Our electric bike is quipped with a brushless power system, the motor's current utilization rate is increased, the torque and power output are increased, the speed is strong, and the uphill is easy.

### With USB Charging Bracket

Our e-bikes are equipped with a USB charging unit at the front. The built-in USB interface can be used to charge mobile phones or mobile devices, which can ensure that they are fully charged when riding

### Double Disc Brakes

Using the car ABS disc brake system, the front and rear double disc brakes can brake quickly and smoothly during emergency braking, and can also quickly dissipate heat to ensure riding safety.

## Ride Our Little Beast and Chase Your Freedom

- SAMEBIKE 20 \*4" Fat Tire Electric Bicycle is made up of the asymmetrical directional tread pattern snow tires, which increases the friction with the ground, which greatly improves the handling and safety of the vehicle on smooth roads and ensures safe riding. And with our **LOTDM200** Fat tire ebike you can go everywhere you want to go .
- Comfortable bike saddle bag ensures that you won't get too tired during long rides and won't damage your lumbar spine.
