Segway Ninebot KickScooter MAX G30LP

Adventures are only one kick away

LED Digital Dashboard

The LED digital dashboard can show you the battery and speed information at a glance.

Three Riding Modes to Meet Your Riding Styles

Eco, Standard, and Sports modes can be directly accessed by the intuitive LED dashboard and can be switched by two clicks, easily controlled under different riding modes.

- Typical range: 25 miles
- Max speed: 18.6 mph *Top speed may be impacted by battery level, environmental temperature and available traction.
- 367 Wh Battery
- Approx. 6.5H Fast Charging
- 220Lbs Weight Load

Upgraded Functions and Range. Apart from the outstanding design, the new Segway Ninebot Max G30LP is designed to be sturdier, and even more powerful.

- 20% Hill Grade
- IPX5 Water-Resistant
- 10-inch Pneumatic Tires
- Built-In Front LED Lights

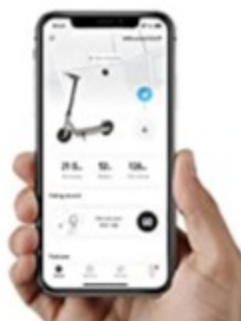

Highly Elevated Riding Experience

The Ninebot MAX G30LP is equipped with the newly upgraded Pneumatic tires, which provides an elevated driving experience with the combination of comfort and shock absorption features, designed to increase riding safety.

Regenerative Braking System

G30LP features a regenerative braking system that turns the scooter into an electric vehicle powered by electricity and recycled energy from riding. Energy will be collected from regenerative braking and distributed when you need a boost, which enhances the user.

Segway-Ninebot App Connectivity

Connect the Ninebot Max G30LP with Segway-Ninebot app through Bluetooth to check your riding speed and remaining battery. You can also upgrade the scooter firmware over-the-air and monitor riding data, which enhances your overall riding experience.

Extraordinary Functionality to Upgrade your Riding Experience

Ninebot KickScooter Max G30LP strives to reach new heights of performance. When you ride on the road, the stronger brushless direct current motor delivers a fast and sturdy riding experience.

Headlights

Upgraded 2.5w high-brightness LED light is designed to illuminate the path ahead of you and increase your visibility to others around you without dazzling them.
