

Car Alarm with charging function TX-100

Monitor vehicle interiors with PIR motion detection sensor

-  12-24V Rechargeable Car Alarm
-  450mAh Battery
-  110dB Alarm Siren
-  Remote Control
-  Standby Time 6 Days
-  2 USB Charging Ports
-  Alarm Triggering at Motion Detection

PIR Motion Detection with 110db Alarm

Monitor vehicle interiors with the PIR motion detection sensor of the TX-100. Once triggered, the loud alarm works as a deterrent to frighten away intruders.

The alarm is not designed to be heard from outside when the doors and windows are closed, or from inside a house or building.

2 USB charging ports with 5V/1A output power each

The TX-100 features 2 convenient USB charging ports to allow fast charging for multiple devices at the same time.

IR remote control

Easily activate and deactivate the TX-100 from a distance with the included IR remote control (~8m distance in open areas).

12-24V rechargeable car alarm for the cigarette lighter socket

A built-in rechargeable battery allows you to take this alarm with you anywhere.

Easy to carry security solution perfect for a variety of uses

Tents

The internal battery has a standby time of 6 days, making the TX-100 ideal for security while tent camping.

Boats

With a 12-24V cigarette lighter socket, the TX-100 makes boat security simple.

RVs & Motorhomes

With its space saving design, the TX-100 is the perfect DIY security solution for RVs and motorhomes.

In the Home

The 120° cone angle detection range allows for monitoring small areas within the home for added protection.
