Pay only applicable taxes and fees.

Ooma Telo Air 2

Ooma Telo Air 2

Smart Home Phone Service with WiFi + Bluetooth Connectivity

The smartest home phone service is the one that gives you exactly what you want with the greatest savings. That's Ooma Telo. Connect Ooma Telo Air to your high-speed Internet wirelessly and get crystal-clear nationwide calling. All you pay are applicable taxes and fees.

- PureVoice HD technology for clarity and reliability
- Integration with Amazon Echo and its voice-enabled smart assistant, Alexa
- Caller-ID, call-waiting, voicemail, and 911 with text alerts
- Wireless and Bluetooth connectivity so you can place your Telo anywhere in your home.
- Online portal with call log, preferences and contacts
- One-touch voicemail audio playback
- Remote voicemail retrieval and online playback
- Live customer support

Place your Telo anywhere and connect to the Internet wirelessly using your WiFi network. Bluetooth pairing with your mobile phone to answer incoming mobile calls from any phone in your home. Easy app-based setup. Smartphone, credit card and high-speed Internet required.

Upgrade to Ooma Premier, and get all the features included in Ooma Basic Service plus these advanced features:

Calling Features

- Unlimited calling to Canada, Mexico and Puerto Rico.
- Three-way conferencing.
- See the name of callers even if they're not in your address book.
- Custom ring patterns and enhanced call waiting.

Privacy Features

- Block robo-calls and other unwanted callers.
- One-touch Do Not Disturb and Send to Voicemail.
- Listen as callers leave their message before you answer.

Mobility Features

- Forward your calls to any number.
- Unlimited mobile app inbound and outbound calling
- Forward voicemail to your computer or smartphone email.

Google Voice Extensions

- Access Google Voice voicemail from your Ooma Telo base station.
- Present your Google Voice number as your outbound caller-ID.
- Enable Call Screening and Listen In features on your Ooma Telo.

Connect your phone. Connect your home.

Ooma Telo + Amazon Echo: Voice activated dialing

With Amazon Echo and its voice-enabled smart assistant, Alexa, you can initiate phone calls by number or by contact name and check voicemail, all through Ooma's cloud platform. The Ooma Skill can be enabled from the Amazon Alexa app and activated for a free trial for Amazon Echo users.

Ooma Smart Security with Remote 911

Get affordable, do-it-yourself smart home security with the ability to call 911 remotely from your home phone number even when you are not at home. Check the status of your home 24/7 and receive app notifications and phone call, text or email alerts when there is unexpected activity. Easy wireless installation of sensors anywhere in your home. No hidden fees or contracts.

Ooma Telo Mobile App

Download the Ooma Telo Mobile App and take your Ooma service on-the-go. Make free U.S. calls on your smartphone using your Ooma phone number from anywhere in the world using WiFi. Features include the ability to upload contacts to the address book, listen to voicemail, and change Ooma preferences directly from the app. Compatible with iOS and Android mobile devices.

Ooma World Plan

Unlimited international calling to over 60 countries. Keep in touch with friends and family virtually anywhere in the world for next to nothing. Save money with the unlimited Ooma World Plan. Or, pay as you go with low everyday rates. Use the Ooma Telo Mobile HD app for iOS or Android to call from anywhere. Requires Ooma device and active account.

What is PureVoice HD?

With PureVoice HD technology Ooma delivers crisp, clear voice quality and fewer dropped calls even when the Internet is busy.

- Ooma's adaptive redundancy detects packet loss and automatically sends redundant packets for better sounding phone calls and fewer dropped calls.
- Ooma HD Voice technology doubles the fidelity of your phone calls. When you and the other caller use an Ooma handset or mobile app your voice sounds more natural.
- Ooma uses an advanced voice compression algorithm that reduces bandwidth consumption by 60 percent over standard VoIP technology.
- Ooma prioritizes voice packets without slowing down the rest of your network so you can enjoy crystal-clear calls even while viewing online video.
- Ooma takes your privacy seriously. We use the same encryption technology governments use to protect classified data (which makes Ooma even safer than your old landline).

Requirements

- High-speed Internet connection
- Minimum 180 Kbps upstream network speed
- Corded or cordless home phone, or optional Ooma HD3 Handset
- Intended for residential use only
