

Pro-grade streaming with ASUS AI noise-canceling microphone

Upgrade any video streaming experience with **ROG Eye S**. Featuring a Full HD, 60 fps webcam and an AI noise-canceling microphone, it folds to just 17 mm thin, so it easily slips into a pocket. When you're ready to stream, simply attach the camera and plug it into a USB Type A port. Adjust the camera to the perfect angle and enjoy incredibly sharp, smooth streaming video with supremely clear audio.

Smoother and sharper Full HD streaming

Serious streamers demand hyperfast frame rates for the smoothest video – and **ROG Eye S** delivers flawless visuals with 1080p resolution at 60 fps. This is double the frame rate of conventional cameras, empowering the capture of every detail and nuanced expression without lag or distortion.

Brighter and clearer imagery

ROG Eye S includes Face Auto Exposure and autofocus technologies that quickly detect your face and fine-tune the image as needed. This automatically makes your face appear brighter and sharper – so you stand out from the background. It's the ideal solution when streaming from a darkened gaming cave!

ROG Eye S

Blue-glass filter

ROG Eye S is equipped with blue glass to filter infrared light and reduce color shifts. This improves the image quality by eliminating the color cast that can plague streams.

Beamforming mics with AI noise-cancelation technology

Beamforming microphones with ASUS AI Noise-Cancellation technology prime **ROG Eye S** to deliver audio perfection. The smart mics are able to detect and minimize 500-million types of background noise while preserving vocal harmonics, ensuring crystal-clear communication. Background chit-chat, keyboard clatter and mouse clicks are reduced by up to 95%.

Compact and foldable

ROG Eye S is compact and slim – folding to just 17 mm thin to slip easily into a pocket. It securely attaches to any modern laptop without effort, and it's the perfect style match for ROG laptops. For added flexibility, its aluminum-alloy base includes a standard camera mount (1/4" diameter, with 20 threads per inch), so **ROG Eye S** can be easily attached to a tripod.
