League of Legends in Every Detail

This AOC monitor features some small gadgets to highlight League of Legends in experiential details. The boot up screen and on-screen display are both designed in the style of the MOBA.

Fast and Smooth Gameplay

The League of Legends edition monitor is equipped with top-notch features such as a 170 Hz refresh rate and a 1ms response time. FreeSync Premium and G-SYNC compatibility further support the non-stop smooth performance of your visuals.

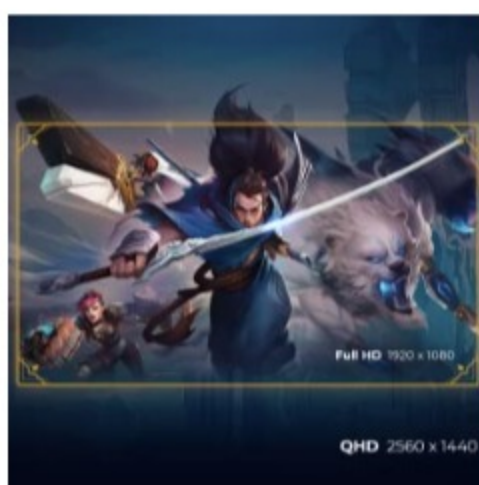

Hextech Inspired Design

The emerging craftsmanship known as Hextech is a fusion between magic and technology - a new advancement in the world of Runeterra. The artifacts forged with this fabled method are astonishingly powerful and sport a unique and intricate design. Get your real-life piece of Hextech gear with this AOC monitor, as its exterior is embellished with the characteristic pattern!

Maximum Immersion

Become one with the game and fully immerse yourself into the action on Summoner's Rift! This AOC monitor syncs up with the MOBA itself and lights up in response to in-game events. Team fights will become even more adrenaline-pumping. Victory never looked this good!

Stellar Image Quality

The QHD resolution of 2560 x 1440 VESA DisplayHDR 400 provides stunning image quality and delivers blacker blacks, so that images and colors pop. The IPS panel is the perfect medium to display the game in all its glory.

QuickSwitch

QuickSwitch external remote gives you a competitive edge by letting you conveniently switch between game modes and adjust gaming features on the fly.
