LEGION 5

Performance
for the real players

Ultimate Performance. Uncompromised Battery Life.

They say life is full of compromises. They say you can't have high performance and long battery life on the same notebook. The Legion 5 features an RTX 3060 Graphics card with a max TGP of 130W as well as a Ryzen 7 mobile processor, while also boasting a battery with great capacity to handle almost every performance task thrown at it. Never compromise on your gaming laptop again.

Immersive Visuals. Fast Refresh

Whether you're favoring blindingly fast refresh rates and response times on your gaming panel or hyper-realistic visuals, the Legion 5 has you covered. Deepen your immersion in FHD with the visual engineering and graphical pyrotechnics of up to Dolby Vision, 100% sRGB and 300 nits Brightness with 85% AAR with improved color accuracy on the 15.6" widescreen display or enhance your competitive edge with blistering refresh speeds of up to 165Hz with 3ms response times via Overdrive support. The Legion 5 also features Free Sync and GSYNC for stutter free gaming.

AI Assisted Gaming

The Lenovo Legion AI engine breaks new barriers in gaming. It optimises performance automatically to any of the Top 16 AAA games you're playing with auto detection, dynamically allocating CPU and GPU usage accordingly to get up to 15% higher FPS. Now every game will be optimised, and frame rates will be maximised.

Cooler. Smarter. Coldfront 3.0

Extending its legacy of max clock speeds with zero throttling over long sessions, the Legion Coldfront 3.0 ups the stakes even further, with an intelligent intake system, turbo-charged dual fan design and quad channel exhaust system with improved thermal fins, intake vents underneath each keyboard switch and heat sinks. A new intelligent mode uses artificial intelligence to optimize the most demanding titles without breaking a sweat, while Q Control 4.0 lets you control fan speed and voltage to shift between full-throttle flow or extended battery life.

Nahimic Audio for Gamers. Immersive 3D Audio

Nahimic drastically improves your gaming experience with its immersive 3D audio and engaging features for gamers. Experience crystal-clear communication with teammates. Nahimic is a new way of playing and Legion Gamers can exclusively enjoy Easy Surround, an innovative audio solution that turns any Bluetooth speaker into a surround sound system which can also be shared with your team by pairing two headsets at once. The impressive Sound tracking feature also helps you keep a close eye on your competitors by effectively tracking the direction of the sound even at night thanks to its night mode.

Strike Hard. Strike True.

Tactile. Responsive. Accurate. The Legion 5 features the Legion TrueStrike keyboard. Forged from years of Lenovo innovation, TrueStrike features soft-landing switches with 1.5mm key travel that leverage a second transition design, meaning you get deeper strokes with equal force on every strike for an improved input experience, offline or on. TrueStrike further delivers a superior layout with dedicated media keys, number pad, larger arrow keys and one-piece trackpad each individually brought to life with optional 4-Zone RGB backlighting along with an anti-ghosting feature.

Every session uninterrupted

Featuring rapid charge that can get you up and ready in a matter of a few minutes in case you run out, how fast? Get up to 50% charge in just 30 minutes. Not just that the 80W battery ensures you can go on gaming for a while without having to plug in. The Legion 5 ensures that the fun never stops.

Performance ready connection

Whether it's an extra display or a joystick or a racing wheel or even a Bluetooth mouse, the Legion 5 is always ready to connect with its multiple ports like 4 USB 3.2 Gen 1 (1 port - Always On), 2 USB 3.2 Type-C Gen 1 (Supports Display Port 1.4, 1 supports power delivery) and an HDMI 2.1 port. Not just that, this connectivity is clutter less too, with many ports cleverly put on the backside of the laptop so you can have a tangle free experience every time.

Never miss a task or target

With Legion Ultimate Support, get 24/7 access to our technicians for effortless help. Whether it's hardware or software, day or night we've always got your back. All you need to do is just get in touch and an expert will assist you.
