

## Designed to perform and impress

Great things do come in the smallest packages. Housed in a sleek and compact frame, the Lenovo IdeaCentre AIO 3i delivers peak performance with 11th generation Intel Core processors and integrated Intel UHD graphics, while holding mountains of storage with an efficient SSD. Three-sided narrow bezels on the FHD display and Harman-certified stereo speakers make this the consummate family PC.

## Crystal-clear sights and sounds

With its three-sided thin, narrow bezel design, the IdeaCentre AIO 3i gives you and your family superb wide-angle viewing. While the FHD display delivers vibrant, crystal-clear colors, the Harman Kardon-certified audio system streams sharp, true-to-life audio over 3W stereo speakers.

## Designed to make sense

Multi-tasking between your phones and PCs could be a hassle. The slim and compact IdeaCentre AIO 3i now comes with a dock on its stand to place your mobile phone, helping to facilitate multi-screen engagement. Its sleek design hides a camera with up to 5M clarity that makes your video conferencing and chatting more real and enjoyable. Plus, you can just shut down the camera and control who gets to see you.

## Pint-sized powerhouse

The IdeaCentre AIO 3i packs a wallop from behind a compact chassis. Experience seamless and blazing performance on even the heaviest workloads, thanks to its 11th Gen Intel Core processing and integrated Intel UHD graphics. Your household now has a store for its vast media library. Store your favorite movies, songs or photos with plenty of solid state disk storage, which offers faster boot times, file transfers and system responsiveness.
